Autocourts etc.

3

Functional expiry:

- The motorcycle is driven in the arrangement. The value brand is thrown and the start button low-spirited.

- With the prespray lance one has from 60 to 90 sec. times (according to operator's wish), the motorcycle spray by hand and strong ones to solve soiling with the help of a paintbrush.

- Renewed pressure of the start button begins the automatic run of the arrangement, the rolling gate shuts..

*The rotary plate turns clockwise on approx. 90 °, holds for approx. 2
Afterwards seconds and turns against clockwise around approx.
450 ° back. During this recurring movement become
cyclically all programmes removed.*

- The first way is the order of a foam cleaner and now from this Motorcycle on the rotary plate steadily turns.

- The second way is the main laundry.

- The third way is an order of brilliant dryer with corrosion prevention.

- The last way is the drying with the help of the high-capacity blower.

- By the big discs the washing process is able any time observed become.

- The rolling gate opens and the laundry is finished.

- The rotary plate lines up in such a way, that the motorcycle forward are pushed out / driven is able.

4
